LABEL MATRIX QuickDraw supports Database Connection

Introduction:

This month Newlynx shows how LABEL MATRIX QuickDraw supports Database Connection with a few simple clicks. Beside, LABEL MATRIX 8.3 has the option to display Simplified Chinese Graphical User Interface

1. Go to **Insert > Database File**

2. Click "File" and select the database file to be linked

3. Select the database file. The database file support Access, Excel, FoxPro, Text and dbf.

4. The Excel file has been analysis for the data

Add Database Wizard							×
	Record Below a can ch selectin	is Analyze are a list o ange the s ig the field	t 8 the fie ample - and pr	lds thi value essing	at have been or the max ler 3 the Propertie	found in ea ngth of any is button.	ich record. You of the fields by
	Name	Sample	Type	Min	Max		
	Mode	ддд	U	3	3		
	P/N Qty	111 10	N	32	3 2		
	Add	a text ima	ge for e	each f	ield		Properties
	C	Help		<<	Back 1	Vext >>	Cancel

1111

5. Click "Finish" to complete the process.

	×
The final step in adding a new database is to name the database and give the database a description. The name defaults to the database's table name. Name: DATA\$	
Description Samples link to Excel	
You have entered all the information that is required by the New Database Wired. You can now cick Finish to add the database is your label or Cancel to eait the woold without adding the database.	
Help << Back Finish Cancel	

6. Go to **Insert > Text**, select the origin as "**Database**"

		Co	lor		
	Ger	neral			Data
Origin:	Databas	se			*
	Constan	ıt
